Eligible uses of grant funds include, but are not limited to: purchase of materials, supplies and nursery stock; equipment rental; printing and postage for publicity and promotional materials; refreshments and other incentives for volunteers; bus transportation for school field trips; and honoraria and other expenses for workshops, conferences and in-services.

Be sure to itemize costs and provide a brief, but detailed description on your proposed expenditures. For example, “supplies” would be considered an inadequate description, and must be detailed in the form of a specific list of materials, such as: books, refreshments, printing and copying, equipment, etc. Include shipping, handling and taxes where applicable.

List in **Section “B”** expenses for which your group will not be seeking reimbursement (due to ineligibility or otherwise), but have anticipated are necessary in order to complete the project. Include the source of funding for these expenses.

Please note, your first subtotal, labeled “Subtotal – Eligible Expenses/Total Grant Funding Requested” should reflect the total amount of funding for which your project is seeking grant funding. Your project will not be awarded grant funding in excess of this amount, nor can this subtotal be added to once the application is submitted, therefore it is imperative that your expense report be thorough and exhaustive. You may add lines to the expense report as necessary to fit all expenses in the report.
